Nitrophoska[®] Special

Nitrophoska[®] Special is a NPKS +TE compound fertiliser designed to provide uniform delivery of nutrients to your tree, vine or vegetable crop. Nitrophoska[®] Special contains all nutrients in one granule, promoting even nutrient distribution and plant uptake reducing potential crop variation in the field.

Nitrophoska[®] Special contains both nitrate and ammonium nitrogen to meet crop needs.

Nitrophoska[®] Special is now available at Impact Fertilisers' Townsville and Brisbane depots.

Why use Nitrophoska[®] Special?

- ✓ All nutrients contained in one granule to promote a more even distribution and plant uptake.
- ✓ Contains calcium, magnesium and key trace elements including iron and boron.
- ✓ Ideal planting fertiliser for all horticulture cropping systems for a healthy start.

Typical Analysis (w/w%)						
N	P	K	S	Ca	Mg	B
12.0 4.8% Nitrate 7.2% Ammonium	5.2 3.4% Water Soluble 1.8% citrate soluble	14.1 As Sulphate	8.0 as Sulphate	3.2	1.2	0.02
